EXPERIENCE

TRO – NR6 6AS , Junior Software Developer

FEB 2022 - NOV 2022

During my time at TRO I worked 324 hours of industry placement, during this time I worked on several general IT support issues as well as developing a piece of software for them. This software was an asset management system that would be used to manage client assets going in and out of the company, it was developed using C#, React.JS and Node.JS for the main code files and SQL to create a relational database for storing the clients asset data.

UNRELATED EXPERIENCE

Archers Butchers, NR1 4AB

August 2022 - Current

Education

T Level Digital Production Development and Design

City College Norwich

SEP 2021 - June 2023

- GCSE (9-1) Combined Science: Trilogy 4:4
- GCSE (9-1) English Literature 5
- GCSE (9-1) Food Preparation and Nutrition 5
- GCSE (9-1) History 7

Projects

Occupational Specialist

For this project i acted as a full stack developer creating a solution for a made up charity “Health Advice Group” for this project i used the python libraries Flask and Jinja , HTML , Bootstrap and SQL, this is the project that i created for the final grade of my T level course, as this was an exam i currently don't have the code available to upload and share.

Basic portfolio site

This was a personal project that i decided to create as a way to practice my web development skills and get used to using “Git” specifically github, this site is going show off and allow access to the rest of my projects that i have worked on once there is more to show or once i've recovered code i don't have access to currently.

Languages / Libraries

Python

Flask

Jinja

sqlite3

HTML

CSS

Bootstrap

SQL

SKILLS

MVC Framework

Agile Development

Relational databases

Git
